Profile

Software Developer with strong expertise in backend systems, microservices, and full-stack development. Proficient in Python, Go, JavaScript, and cloud technologies like AWS. Experienced in building scalable systems, optimizing performance, and delivering impactful solutions that drive user engagement and business growth.

Technical Skills

Programming Languages: — Python, JavaScript, goLang, typescript

Frameworks: — Django Rest Framework, Express, React, rails

Cloud & DevOps: — AWS (EC2, S3, Lambda), Docker, Firebase

Databases & Caching: — PostgreSQL, MySQL, MongoDB, Redis

Version Control: — Git, GitHub, Bitbucket, Jira

System Architecture: — Microservices, RESTful Architecture

Professional Experience

Apr 2024 – present Raipur, India	Software Developer, CodeNicely - Developed and deployed a microservices infrastructure supporting 1000+ APIs, increasing user engagement by 40% and reducing customer support tickets by 25%. - Improved API performance, cutting response times by 50%, leading to a 30% rise in daily active users and 15% higher retention.
Mar 2023 – Apr 2024 Bhilai, India	Software Engineer, Nirvana Group - Implemented Flutter-based dynamic app templates, accelerating client project delivery by 20% and winning 3 enterprise contracts - Refactored legacy codebase, reducing load times by 25%, decreasing bounce rates by 40%, and boosting session duration by 18%.

Projects

- HealthPotli - Online Pharmacy**, Tech Stack: *DjangoRESTFramework, PostgreSQL, Redis, Razorpay* [🔗](#)
- Led a team to build a lab booking system serving 10,000+ users monthly, increasing engagement by 25% and generating ₹5L+ monthly revenue.
 - Integrated Razorpay for 5,000+ transactions with a 99% success rate, boosting purchase completion by 30%.
 - Designed an order management system, reducing processing time by 35% and fulfillment errors by 40%.
- NoteNest – Notes and Todo App with Export & Formatting Capabilities**,
Tech Stack: *Wails, Go, React, TypeScript, HTML-to-PDF* [🔗](#)
- Built a cross-platform desktop app with advanced note management, rich formatting, and theme customization. ([🔗](#) Download Link)
 - Added export-to-PDF, image embedding, and data recovery features, enhancing user experience and safety.
 - Optimized frontend modularity and backend responsiveness using Go routines.
- BOGO (Buy One Get One Offer App)**,
Tech Stack: *DjangoRESTFramework, PostgreSQL, AWS(EC2, S3), Razorpay, MSG91, Redis* [🔗](#)
- Created a voucher platform handling 10,000+ daily transactions with a 98% payment success rate.
 - Added location-based offer discovery, increasing user engagement by 20% and merchant participation by 35%.
 - Enhanced backend speed with Redis caching, doubling user capacity.
- Music Library Management API**, Tech Stack: *Node.js, Express, PostgreSQL, Render, JWT Authentication, RESTful APIs* [🔗](#)
- Developed a secure, role-based RESTful API with 25+ endpoints for managing artists, albums, and tracks.
 - Designed normalized database schema and favorite marking features to improve performance and user satisfaction.
 - Deployed robust authentication and error handling on Render.

Education

2019 – 2023 Raipur, India	Bachelor of Technology in Computer Science Engineering , <i>Shri Shankaracharya Institute of Professional Management and Technology</i> Percentage: 78%
